

Taiyo Nippon Sanso Corporate Profile

Taiyo Nippon Sanso Corporation (TNSC) was the first to develop MOCVD equipment in 1983 to produce compound semiconductors used for LEDs, lasers, and electronics for mobile phones, advanced lighting, and optical communications. TNSC provides full end-to-end solutions for MOCVD applications with MOCVD equipment, dry cleaning tools for quartz/graphite components, specialty gas sources, and gas purification and abatement systems.

TNSC (www.tn-sanso.co.jp) is a Japanese-headquartered multinational industrial gas and equipment manufacturer incorporated in the year 1910. TNSC conducts global business in North America (www.mathesongas.com), Europe (www.nippongases.com), Asia, and Oceania.
