

SKOUT

CYBERSECURITY

Enabling MSPs to sell Cybersecurity as a Service

SKOUT partners with MSPs to deliver cybersecurity solutions by offering products, tools, personnel, and go-to-market support. Our product stack can be integrated directly into managed service packages and are all managed and backed by our fully US based 24x7 Security Operations Center. The current SKOUT product stack is fully managed and comprised of network security monitoring, log monitoring, endpoint protection, and email protection. All products are available bundled or individually.

CHANNEL ONLY PARTNER PROGRAM

62%

62% OF SMALL BUSINESSES

claim that they lack the skills in-house to be able to properly deal with security issues.
