

Giving customers freedom to innovate with secure & trusted cloud services.

OVHcloud is a global cloud provider, Europe's #1 hyperscaler and a pure player cloud provider.

- ▶ **Your Trusted Cloud Provider** – Full data sovereignty and security controls from European HQ provides protection from CLOUD Act.
- ▶ **Predictable Pricing** – Transparency and no data transfer ingress or egress charges ensures predictable pricing.
- ▶ **Open Ecosystem** – Interoperability through open standards enables reversibility with no vendor lock-in, hybrid cloud and full use of innovative computing platforms and software.
- ▶ **Hyperscale Innovation** – Our integrated value chain, collaborative R&D for customised servers and our unique water cooling system delivers leading price-performance ratio and energy efficiency,

Key Facts

1.5m Customers across 132 countries

Over 1m Servers produced since 1999

PUE 1.09 energy efficiency indicator

OVHcloud Universes

Bare Metal Cloud

Servers customised for performance & efficiency in partnership with intel and AMD

Dedicated Servers HPC Big Data Storage

- ▶ Versatile dedicated server infrastructure, delivered available in 120 secs
- ▶ Multiple hypervisors and operating systems available
- ▶ Built using the latest high performance CPUs & GPUs for intensive workloads

Public Cloud Infrastructure

Guaranteed resources on one of the world's largest OpenStack deployments

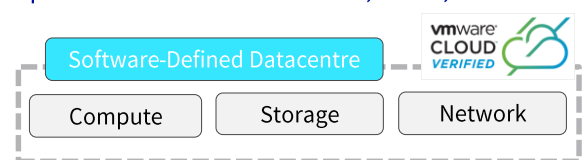

Compute Storage Network POWERED

- ▶ Flexible infrastructure validated on OpenStack
- ▶ Open-source API integrations and automation
- ▶ Wide range of instances for various uses
- ▶ Options for high performance IOPS
- ▶ Predictable, all inclusive pricing that maintains pay as you go flexibility
- ▶ Transparent billing, no fees for extra bandwidth or traffic

Hosted Private Cloud

Fully managed vSphere platform is secure and optimised with OVHcloud hosts, vRack, vSAN & NSX

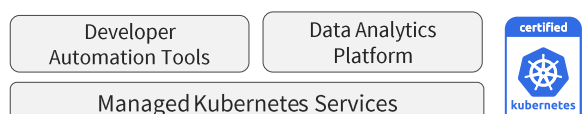

- ▶ 100% dedicated resources to scale up or down on demand (min 2 hosts)
- ▶ OVHcloud managed hosts and datastores
- ▶ Leading VMware SDDC platform including vSphere licences, NSX, vSAN and vRops.
- ▶ Your hosted private cloud, delivered in under 30 mins, reducing time to market

Public Cloud PaaS

Fully managed certified container services including autoscaling, load balancing and private registry.

- ▶ Managed platform services include predictable pricing, networking and security.
- ▶ Data Processing & ML Serving automated services

Why OVHcloud?

Leading price-performance ratios across the board.
 For comparative solutions for 10 hosts, OVHcloud Hosted Private Cloud outperforms VMC on AWS and Azure Cloud Simple with 50% cost savings.

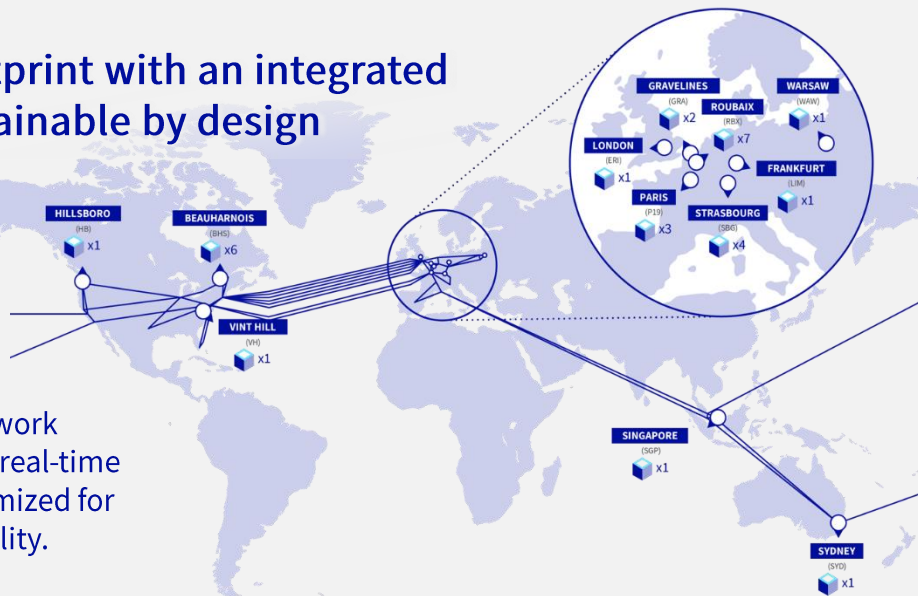

Expect **25%** average cost savings

OVHcloud Public Cloud High IOPS virtual machines provide the highest performance and best economy

A global datacentre footprint with an integrated supply chain that's sustainable by design

- ▶ We design, build and operate our own 30 datacentres in 4 continents to provide global availability with local presence.
- ▶ Our 20Tbps fiber-optic global network across 34 points of presence with real-time monitoring and anti-DDoS is optimized for stability, redundancy and availability.

Use Cases

- ▶ DC Extension and Migration
- ▶ Continuity and Disaster Recovery
- ▶ Hybrid and Multi-Cloud
- ▶ Business critical applications
- ▶ Certified solutions for specific sectors to support compliance
- ▶ Data analytics & AI/ML processing
- ▶ Ecommerce, web and database apps
- ▶ Enable Cloud-native & Kubernetes

Helping your customer to transform and innovate at any stage of their cloud journey.
