solarwinds msp

The SolarWinds MSP Advantage

Business Growth   **Security**   **Innovation**

SolarWinds® RMM

A cloud-based remote monitoring and management (RMM) dashboard designed to help efficiently secure, maintain, and improve your IT management via a single pane of glass.

SolarWinds N-central®

A highly configurable remote monitoring and management platform that offers on-premises and hosted options, designed for managed service providers who require more customization for complex environments.

SolarWinds Backup

A cloud-first data protection service that lets you manage server, workstation, document, and Office 365® backups from a single dashboard. Backup storage in our global cloud is included.

SolarWinds MSP Manager

An agile, versatile, cloud-based service-management and help-desk solution designed to offer an easy way to manage and optimize your IT service business.

SolarWinds Mail Assure

An easy-to-use cloud-based email fi ltering and archive solution designed to help make business email secure and available for your clients.

SolarWinds Risk Intelligence

A powerful, easy-to-deploy, cloud-based software system designed to help identify at-risk data in your managed networks and quantify it in terms of the potential financial impact of a breach.

SolarWinds Threat Monitor

A powerful, streamlined, automated threat-monitoring solution designed to help you detect, respond to, and report on threats in near-real time.

SolarWinds Take Control

A fast, easy-to-use remote access tool designed to help you fix issues remotely and collaborate easily with other technicians.

SolarWinds Passportal + Documentation Manager

An automated password protection solution designed for MSPs to store, manage, and retrieve customer credentials and privileged client knowledge.

All products are built from the collective intelligence of	22,000 Businesses	500,000 Networks	6,300,000 Endpoints	1,800,000 Mailboxes

RMM & N-Central: Features at a Glance

Both cloud and on-premises RMM software were built to drive efficiency and grow your IT services business.

✓	**Managed Antivirus**	A full-featured anti-malware feature designed to be easily deployed and managed.
✓	**Patch Management**	Help manage Windows® and third-party updates across your customer base and help leverage powerful automation.
✓	**Web Protection**	Help protect users from visiting malicious websites that could harm your network and devices.
✓	**Remote Monitoring**	Help monitor the health and availability of your customers' devices and applications from a unified dashboard.
✓	**Active Discovery**	Designed for automatic identification and management of new devices as they come onto the network.
✓	**Automation & Scripting**	Create scripts to help automate routine tasks using a drag-and-drop interface designed for simplicity—no need to learn a scripting language or write a line of code.
✓	**Backup & Recovery**	A cloud-first backup solution designed to help you back up quickly and reliably with optional local storage for speed—leveraging the cloud for security and availability.
✓	**Mobile Device Management**	Help monitor, maintain, and keep track of company- and employee-owned mobile devices.
✓	**Remote Access**	Help resolve tickets fast by repairing workstations and servers without leaving your desk.
✓	**Reporting**	Create robust customer-facing reports that help drive IT strategy and help prove the value of your services.
✓	**Real-Time Architecture**	Benefit from an ultra responsive, near-real time monitoring platform designed for faster, more proactive service.
✓	**Cross-Platform Support**	Help deliver high levels of service to your Windows, Mac® and Linux® user communities.
✓	**Risk Intelligence**	Identify sensitive, hard-to-find personal data in a network and help calculate the potential cost of a data breach.
✓	**Email Security**	Leverage an email security solution designed to help provide robust email protection, cloud-based email continuity, and long-term email archiving at a strong price.
✓	**Cloud/SaaS Model with On-Premises Options**	SaaS and on-premises software solutions designed to fit your needs, whether it's managing from the cloud or your own infrastructure.
✓	**Endpoint Detection and Response**	Get an endpoint protection solution designed to prevent, detect, and respond to ever-changing threats—and recover quickly when ransomware or other exploits strike.
✓	**Password and Documentation Management**	Help boost security with automated password management designed to protect your team's user credentials and offer quick access to customer knowledge and documentation.

"For us, it was like getting the keys to the Ferrari. Our relationship with SolarWinds MSP brought us closer to our customers."

–Jim Wilson, President, NetCertPro
